1. The Air Section agrees with the views as expressed in the report written by [REDACTED] DPD/Security Section.

2. Paragraph 12 outlines the short comings of the Agency's method of conducting test programs for the past many years in the airborne field. This Section feels that the origination of the Domestic Air Unit will resolve those security problems which have been prevalent in the past, since solution of any future problems will be turned over to the Domestic Air Unit directly, without involving task forces from Headquarters. It is felt that on some occasions individuals with peculiar technical background may be called upon to assist the Air Unit, but on the whole the number will be held to a minimum.
